

Model Number

No.	Product name	Model	Specifications	Product Description	Installation method
			Height × Width × Depth (mm)		
1	IDC front air-conditioning cabinet	ST IDC001	2200*600*1200	47U installation space	Suitable for indoor floor-standing installation
2		ST IDC002	2200*600*1000	47U installation space	Suitable for indoor floor-standing installation
3	IDC lower air inlet cabinet	ST IDC003	2200*600*1100	47U installation space	Suitable for indoor floor-standing installation

Product Features

1. IDC mainly uses three air supply methods: upper air supply, lower air supply, and front air supply;
2. The bottom of the lower air supply is equipped with a push-pull air supply port, which facilitates users to flexibly adjust the air supply volume to ensure the temperature of the computer room;
3. The front and rear doors of the front air supply cabinet use mesh doors with good heat dissipation performance;
4. The PDU is interchangeable and equipped with an LED power indicator device, which can better detect whether the PDU is running normally and is supplied with power, and is equipped with an anti-trip function.

Application

IDC provides large-scale, high-quality, safe and reliable professional server hosting, space rental, network wholesale bandwidth, ASP, EC and other services for Internet content providers (ICP), enterprises, media and various websites. IDC is a place for hosting enterprises, merchants or website server groups; it is the infrastructure for the safe operation of various modes of e-commerce, and it also supports enterprises and their business alliances (its distributors, suppliers, customers, etc.) A platform for implementing value chain management.
